Item 2.02 Results of Operations and Financial Condition

Quarterly Results Press Release

On Tuesday, April 21, 2020, a press release was issued regarding the second quarter results of Emerson Electric Co. (the "Company"). A copy of this press release is furnished with this Current Report on Form 8-K as Exhibit 99.1.

References to underlying orders in the press release refer to the Company's trailing three-month average orders growth versus the prior year, excluding currency, acquisitions and divestitures.

Non-GAAP Financial Measures

The press release contains non-GAAP financial measures as such term is defined in Regulation G under the rules of the Securities and Exchange Commission. While the Company believes these non-GAAP financial measures are useful in evaluating the Company, this information should be considered as supplemental in nature and not as a substitute for or superior to the related financial information prepared in accordance with GAAP. Further, these non-GAAP financial measures may differ from similarly titled measures presented by other companies. The reasons management believes that these non-GAAP financial measures provide useful information are set forth in the Company's most recent Form 10-K filed with the Securities and Exchange Commission.

Forward-Looking and Cautionary Statements

Statements in the press release that are not strictly historical may be "forward-looking" statements, which involve risks and uncertainties, and Emerson undertakes no obligation to update any such statements to reflect later developments. These risks and uncertainties include the scope, duration and ultimate impact of the COVID-19 pandemic as well as economic and currency conditions, market demand, including related to the pandemic and oil and gas price declines and volatility, pricing, protection of intellectual property, cybersecurity, tariffs, competitive and technological factors, among others, as set forth in the Company's most recent Annual Report on Form 10-K and subsequent reports filed with the SEC.

Item 8.01 Other Events

The following risk factor supplements the "Risk Factors" section in Part 1, Item 1A, of our Annual Report on Form 10-K for the fiscal year ended September 30, 2019 (our "Form 10-K). The following risk factor disclosure should be read in conjunction with the other risk factors set out in our Form 10-K.

The Recent Coronavirus (COVID-19) Outbreak Has Adversely Impacted our Business and Could in the Future Have a Material Adverse Impact on our Business, Results of Operation, Financial Condition and Liquidity, the Nature and Extent of Which is Highly Uncertain

The global outbreak of the coronavirus (COVID-19) has significantly increased economic, demand and operational uncertainty. We have global operations, customers and suppliers, including in countries most impacted by COVID-19. Authorities around the world have taken a variety of measures to slow the spread of COVID-19, including travel bans or restrictions, increased border controls or closures, quarantines, shelter-in-place orders and business shutdowns and such authorities may impose additional restrictions. We have also taken actions to protect our employees and to mitigate the spread of COVID-19, including embracing guidelines set by the World Health Organization and the Centers for Disease Control and Prevention on social distancing, good hygiene, restrictions on employee travel and in-person meetings, and changes to employee work arrangements including remote work arrangements where feasible. The actions taken around the world to slow the spread of COVID-19 have also impacted our customers and suppliers, and future developments could cause further disruptions to Emerson due to the interconnected nature of our business relationships.

The impact of COVID-19 on the global economy and our customers, as well as recent volatility in commodity markets (including oil prices), has negatively impacted demand for our products and could continue to do so in the future. Its effects could also result in further disruptions to our manufacturing operations, including higher rates of employee absenteeism, and supply chain, which could continue to negatively impact our ability to meet customer demand. Additionally, the potential deterioration and volatility of credit and financial markets could limit our ability to obtain external financing. The extent to which COVID-19 will impact our business, results of operations, financial

condition or liquidity is highly uncertain and will depend on future developments, including the spread and duration of the virus, potential actions taken by governmental authorities, and how quickly economic conditions stabilize and recover.

Emerson Reports Second Quarter 2020 Results and Updates Full Year 2020 Guidance

- **Net sales** of \$4.2 billion were down 9 percent; **underlying sales** were down 7 percent as demand declined significantly in March due to the rapid spread of COVID-19
- GAAP EPS was \$0.84, flat versus prior year; adjusted EPS, which excludes restructuring and related costs, was \$0.89, exceeding midpoint of management guidance of \$0.81, as operational declines due to COVID-19 were more than offset by non-operating tailwinds and benefits of previously announced aggressive restructuring actions, which began in the third quarter of 2019
- Delivered strong operating cash flow of \$588 million in the quarter, up \$55 million or 10 percent, and \$1.0 billion in the first half, up
 \$156 million or 18 percent
- Delivered strong **free cash flow** of \$477 million in the quarter, up \$63 million or 15 percent, and \$787 million in the first half, up \$205 million or 35 percent
- · Returned \$1.1 billion to shareholders, including \$306 million in dividends and \$813 million of share repurchases
- Initiated \$40 million of restructuring actions in the quarter, and approximately \$140 million in the first half, continuing strong execution
 on the comprehensive restructuring reset plan outlined in February
- · Updating full-year sales and EPS guidance due to COVID-19 pandemic and much weaker demand environment

ST. LOUIS, Apr. 21, 2020 - Emerson (NYSE: EMR) today reported results for the second fiscal quarter ended March 31, 2020 and announced updated guidance for the fiscal year.

Second quarter *net sales* were down 9 percent and *underlying sales* were down 7 percent excluding unfavorable currency of 2 percent and no impact from acquisitions or divestitures. Growth was

below management expectations in both business segments due to the unforeseen and rapid deterioration of demand in March. The spread of the COVID-19 pandemic and associated uncertainty, social distancing and business closure mandates negatively affected nearly all of our end markets and geographies, particularly in China, the United States, and Europe. One exception, however, was the surge in demand for products and solutions that support medical and life science end markets. Additionally, our businesses were negatively affected by the dramatic drop in oil and gas prices resulting from geopolitical tensions and a surge in global supply. Second quarter *trailing three-month underlying orders* were down 3 percent, reflective of customers across industrial, commercial and residential markets cutting costs and spending budgets in response to operating restrictions and a general drop in economic activity from the pandemic.

Second quarter *gross profit margin* of 42.1 percent was flat compared with the prior year due to effective cost control measures, despite a 9 percent drop in net sales. *Pretax margin* of 16.6 percent and *EBIT margin* of 17.4 percent were up 180 bps and 160 bps, respectively. *Adjusted EBIT margin*, which excludes restructuring and related charges, was 18.4 percent for the quarter, up 240 basis points, on lower sales. This outcome largely reflected lower stock compensation charges due to a significantly lower stock price as well as benefits from aggressive restructuring actions, which began in the third quarter of 2019.

GAAP earnings per share were \$0.84 and **adjusted earnings per share**, which excludes \$0.05 of restructuring and related charges, were \$0.89, exceeding management's guidance of \$0.79 to \$0.83. This adjusted EPS outcome reflects operational declines due to COVID-19 being more than offset by non-operating tailwinds, which included lower stock compensation costs due to a lower stock price, as well as the benefits of aggressive restructuring actions and favorable foreign exchange gains.

Operating cash flow was \$588 million, up \$55 million or 10 percent, and *free cash flow* was \$477 million, up \$63 million or 15 percent, reflecting free cash flow conversion of 91 percent in the quarter.

"The past quarter unleashed unprecedented challenges for not only our people, operations, and customers, but also for national and local governments, health care systems, and certainly families as well," said Emerson Chairman and Chief Executive Officer David N. Farr. "The rapid spread and far-reaching impact of the COVID-19 virus has been staggering and will likely alter the trajectory of our global economy for the foreseeable future. However, I am tremendously proud of our global team for adapting quickly and executing on difficult - yet necessary - decisions to ensure we are poised for long-term success.

"Our top priority is and always will be the safety and health of our employees, customers, and communities across the globe. We have implemented recommended policies and practices to protect our workforce so they can safely and effectively carry out their vital work with steadfast resolve. While the vast majority of our global office-based team is working from home, we recognize the responsibility we

have to support our customers in essential industries that rely on our solutions and services. Such industries include life sciences and medical, water, food and beverage, chemical, energy and power generation. Accordingly, we are driving hard every day to safely and responsibly continue operations to serve our customers in these vital markets. While some of our operating sites remain below full capacity, we are prioritizing the production of Emerson materials and solutions needed on the front lines of the pandemic battle, including solutions used to manufacture respirators, masks and other safety equipment, and life sciences materials.

"As part of our ongoing response to the dynamic market conditions, we maintain regular communications with government officials and other corporate partners involved in the pandemic response. Internally, our leadership team meets daily to review the state of the business, discuss safety, liquidity, and business continuity among other critical management topics.

"The global health crisis, coupled with volatility in the oil markets, has created a significant demand decline in many of our end markets. But we remain confident that our aggressive cost control reset measures already underway, initiated in the third quarter of last year and outlined in detail in February, combined with our strong balance sheet and disciplined operating philosophy, will provide the foundation required to continue to serve our customers and emerge stronger in the long run."

Business Platform Results

Automation Solutions net sales decreased 10 percent, with underlying sales down 8 percent excluding unfavorable currency of 2 percent and no impact from acquisitions. In the Americas, underlying sales were down 11 percent, with the United States down 12 percent reflecting a broad-based drop in demand. Europe underlying sales were down 3 percent, while Asia, Middle East & Africa underlying sales dropped 6 percent, driven by sharp declines in China of over 20 percent.

March trailing three-month underlying orders were down 1 percent, reflecting initial momentum in the early portion of the quarter, particularly in the longer cycle businesses of Final Control and Systems, up 3 percent and 7 percent respectively. In contrast, our instrumentation business was down 9 percent, impacted more severely due to the deteriorating environment driven by COVID-19 and oil demand.

Geographically, the Americas and Asia declined 4 percent and 3 percent, respectively, while Europe was flat as early quarter momentum quickly faded in March as the pandemic took hold. Middle East & Africa grew double digits on easy comparisons from the prior year and some previous project wins being booked. China orders dropped by 12 percent. Overall, we saw customers slow their acceptance and approval processes. Sequential backlog grew 3 percent to \$5.1 billion.

Segment EBIT margin decreased 40 basis points to 14.4 percent. Adjusted segment EBIT margin, which excludes restructuring and related costs, increased 50 basis points to 15.5 percent while adjusted segment EBITDA margin increased 130 basis points, to 20.6 percent. This outcome reflected

Page 4

previously initiated aggressive restructuring and cost reset actions beginning to take effect. Total restructuring in the quarter was \$29 million, and was \$112 million in the first half of 2020.

Commercial & Residential Solutions net sales decreased 7 percent with underlying sales down 5 percent excluding unfavorable currency of 1 percent and the impact of divestitures which subtracted 1 percent. In the Americas, underlying sales were down 3 percent, reflecting a broad-based decline in demand as the quarter unfolded. Europe was down 1 percent as air conditioning market weakness more than offset demand in heat pump markets. Finally, Asia, Middle East & Africa was down 15 percent, driven by a significant drop in China of over 30 percent.

March trailing three-month underlying orders were down 5 percent, with the HVAC, Cold Chain, and Tools businesses each down midsingle digits. Geographically, we saw Asia orders drop by over 14 percent, driven by China, which dropped 27 percent. A strong early growth trend in Europe was held to 4 percent as the pandemic spread and businesses reduced operations in March.

Segment EBIT margin was flat at 21.0 percent. Adjusted segment EBIT margin, which excludes restructuring and related costs, increased 40 bps to 21.6 percent, and adjusted segment EBITDA margin was up 90 basis points to 26.1 percent, driven by aggressive restructuring and cost reset actions which began to yield savings as well as favorable price-cost dynamics. Total restructuring in the quarter was \$9 million, and was \$19 million in the first half of 2020.

2020 Outlook

Management has updated the fiscal year 2020 outlook to reflect the changing demand environment associated with COVID-19 and the concurrent unfolding energy market dynamics. GAAP earnings per share guidance is \$2.62 to \$2.82. Adjusted earnings per share guidance, which excludes restructuring actions and related costs, is \$3.00 to \$3.20, compared to prior guidance of \$3.55 to \$3.80. This drop in guidance reflects the negative impact of reduced global demand, partially offset by aggressive cost containment actions, reduced stock compensation and other non-operating items. Total restructuring actions for the year are now expected to be approximately \$280 million, an increase of approximately \$65 million compared to the previous plan. Share repurchases, now complete for the year, will be approximately \$950 million, compared to the previous guidance of \$1.5 billion. There is no change in the dividend plan. Lastly, we expect capital expenditures to be \$550 million, compared to the previous guidance of \$650 million.

The following table presents the updated 2020 guidance framework:

Sales Growth Guidance		EPS and Cash Flow Guidance	
		GAAP EPS	\$2.62 - \$2.82
Net Sales Growth	(11%) - (9%)	Adjusted EPS	\$3.00 - \$3.20
Automation Solutions	(10%) - (8%)	Tax Rate	~22%
Commercial & Residential Solutions	(13%) - (11%)	Operating Cash Flow	~\$2.75B
Underlying Sales Growth	(9%) - (7%)	Free Cash Flow	~\$2.2B
Automation Solutions	(8%) - (6%)	Capital Expenditures	~\$550M
Commercial & Residential Solutions	(11%) - (9%)	Share Repurchases	~\$950M

This updated guidance assumes, among other items, continued significant demand deterioration in the third quarter, and demand remaining negative through the first half of 2021. It also assumes oil prices stabilize in the \$20-\$30 range during that time period.

"Despite evolving challenges, we will continue to be proactive and rapidly adapt where needed to ensure we are making the best use of our resources," Mr. Farr concluded. "Everyone at Emerson - our Board of Directors, our leadership team and our teammates around the world - has displayed an unwavering commitment to serving our customers and defeating this common enemy. I thank them for their hard work, agility, dedication, and passion as we all work together in the fight against this horrible disease and to position Emerson for continued future success."

Upcoming Investor Events

Today, beginning at 9 a.m. Eastern Time, Emerson management will discuss the second quarter 2020 results during an investor conference call. Participants can access a live webcast available at www.emerson.com/financial at the time of the call. A replay of the call will remain available for 90 days. Conference call slides will be posted in advance of the call on the company website.

Forward-Looking and Cautionary Statements

Statements in this press release that are not strictly historical may be "forward-looking" statements, which involve risks and uncertainties, and Emerson undertakes no obligation to update any such statements to reflect later developments. These risks and uncertainties include the scope, duration and ultimate impact of the COVID-19 pandemic as well as economic and currency conditions, market demand, including related to the pandemic and oil and gas price declines and volatility, pricing, protection of intellectual property, cybersecurity, tariffs, competitive and technological factors, among others, as set forth in the Company's most recent Annual Report on Form 10-K and subsequent reports filed with the SEC.
