4. In the quarter ended December 31, 1997, the Company adopted Statement of Financial Accounting Standards No. 128, "Earnings per Share," (SFAS 128) which establishes standards for computing and presenting earnings per share. Basic earnings per common share considers only the weighted average of common shares outstanding while diluted earnings per common share considers the dilutive effects of stock options, incentive shares and convertible securities. Previously reported earnings per share amounts have been restated to conform to SFAS 128 requirements. Reconciliations of basic earnings per common share and diluted earnings per common share follow (dollars and shares in millions except per share amounts):

Items 2 and 3. Management's Discussion and Analysis of Results of Operations and Financial Condition.

6

Results of Operations

Diluted

Sales, net earnings and earnings per share for the second quarter and first six months of fiscal 1998 were the highest for any quarter and first six-month period in the Company's history.

Net sales were \$3,382.4 million for the quarter ended March 31, 1998, up 9.0 percent (12 percent at constant currency) over net sales of \$3,103.5 million for the quarter ended March 31, 1997, and \$6,553.9 million for the six months ended March 31, 1998, up 10.4 percent (14 percent at constant currency) over net sales of \$5,934.1 million for the same period a year ago. The second quarter results reflect strong U.S. and Latin American growth, solid European performance and the contribution of acquisitions. Excluding the negative impact of currency, underlying international subsidiary sales showed solid improvement. Continued weakness in Asia-Pacific limited export sales, particularly those of the heating, ventilating and air-conditioning business.

In the Commercial and Industrial segment, the electronics business achieved very strong underlying sales growth, driven by contributions from all product lines and service offerings. Excluding the impact of the strengthening dollar, the process business achieved strong sales growth, reflecting very strong domestic demand and solid international demand. Sales of the industrial motors and drives business were solid before the effects of unfavorable currency due to strong international demand and recent acquisitions. Excluding the impact of currency translation, the industrial components and equipment business achieved moderate underlying domestic and international sales growth.

In the Appliance and Construction-Related segment, sales of the underlying fractional motors and appliance components business were strong, benefiting from robust domestic markets and new products. The tools business achieved modest underlying sales growth, while the heating, ventilating and air-conditioning business reported a moderate decrease in sales as weakness in Asia-Pacific severely limited export sales.

Cost of sales for the second quarter was \$2,159.7 million or 63.9 percent of sales, compared with \$1,987.4 million, or 64.0 percent of sales, for the second guarter of 1997. Cost of sales for the six months ended March 31, 1998, was \$4,189.5 million or 63.9 percent of sales, compared to \$3,792.8 million or 63.9 percent of sales for the same period a year ago. Selling, general and administrative expenses for the three months ended March 31, 1998, were \$673.3 million, or 19.9 percent of sales, compared to \$612.2 million, or 19.8 percent of sales for the same period a year ago. For the first six months of 1998, selling, general and administrative expenses were \$1,319.7 million or 20.2 percent of sales, compared to \$1,195.5 million or 20.2 percent of sales for the same period in 1997. Consolidated profit margins remained at high levels despite the inclusion of lower margin acquisitions. Underlying operating margins showed solid improvement, reflecting both domestic and international gains, as a result of continuing cost reduction efforts and productivity improvement programs.

Financial Condition

A comparison of key elements of the Company's financial condition at the end of the second quarter as compared to the end of the prior fiscal year follows:

March 31,	September 30,
1998	1997

\$1,020.5	874.4
1.3 to 1	1.2 to 1
30.6%	27.1%
26.8%	24.9%
	1.3 to 1 30.6%

The Company's interest coverage ratio (earnings before income taxes and interest expense, divided by interest expense) was 13.2 times for the six months ended March 31, 1998, compared to 15.9 times for the same period one year earlier. The decrease in the interest coverage ratio reflects higher average borrowings resulting from share repurchases and acquisitions, partially offset by earnings growth. In the first quarter of fiscal 1998, the Company entered into an interest rate agreement which caps the rate on \$250 million of commercial paper at 6.0 percent through September 1999.

Cash and equivalents increased by \$205.4 million during the six months ended March 31, 1998. Cash flow provided by operating activities of \$586.7 million and a net increase in borrowings of \$474.8 million were used primarily to pay dividends of \$260.9 million, fund capital expenditures of \$265.2 million, fund net purchases of treasury stock of \$210.9 million and fund purchases of businesses of \$107.7 million.

The Company is in a strong financial position, continues to generate strong operating cash flows, and has the resources available for reinvestment in existing businesses, strategic acquisitions and managing the capital structure on a short- and long-term basis.

Statements in this report that are not strictly historical may be "forward-looking" statements which involve risks and uncertainties. These include economic and currency conditions, market demand, pricing, and competitive and technological factors, among others which are set forth in the Company's Annual Report on Form 10-K for the year ended September 30, 1997.

A Participant who believes that he or she is being denied a benefit to which he or she is entitled (hereinafter referred to as "Claimant") may file a written request for such benefit with the Committee setting forth his claim. The request must be addressed to: Compensation and Human Resources Committee, Emerson Electric Co., 8000 West Florissant, St. Louis, Missouri 63136.

E. Upon receipt of a claim the Committee shall advise the Claimant that a reply will be forthcoming within ninety (90) days and shall in fact deliver such reply in writing within such period. The Committee may, however, extend the reply period for an additional ninety (90) days for reasonable cause. If the

8

claim is denied in whole or in part, the Committee will adopt a written opinion using language calculated to be understood by the Claimant setting forth:

(i) the specific reason or reasons for denial,

(ii) the specific references to pertinent Plan provisions on which the denial is based,

(iii) a description of any additional material or information necessary for the Claimant to perfect the claim and an explanation why such material or such information is necessary,

(iv) appropriate information as to the steps to be taken if the Claimant wishes to submit the claim for review, and

(v) the time limits for requesting a review under Subsections F and G.

F. Within sixty (60) days after the receipt by the Claimant of the written opinion described above, the Claimant may request in writing that the Chief

Executive Officer of the Company review the determination of the Committee. Such request must be addressed to: Chief Executive Officer, Emerson Electric Co., 8000 West Florissant, St. Louis, Missouri 63136. The Claimant or his or her duly authorized representative may, but need not, review the pertinent documents and submit issues and comments in writing for consideration by the Chief Executive Officer. If the Claimant does not request a review of the Committee's determination by the Chief Executive Officer within such sixty-day period, he or she shall be barred and estopped from challenging the Committee's determination.

G. Within sixty (60) days after the Chief Executive Officer's receipt of a request for review, the Chief Executive Officer will review the Committee's determination. After considering all materials presented by the Claimant, the Chief Executive Officer will render a written opinion, written in a manner calculated to be understood by the Claimant, setting forth the specific reasons for the decision and containing specific references to the pertinent Plan

9

provisions on which the decision is based. If special circumstances require that the sixty-day time period be extended, the Chief Executive Officer will so notify the Claimant and will render the decision as soon as possible but not later than one hundred twenty (120) days after receipt of the request for review.
