Process Control	+5-10	+0-5	-5-0
Total Emerson	-20-15	-20-15	-15-10

February '02 Order Comments:

Industrial Automation orders reflect continued widespread restrained spending in the North American and European industrial goods markets.

HVAC orders reflect the recent upturn in U.S. residential air conditioning orders. Inventory levels at both OEMs and distributors remain at historically low levels.

Electronics and Telecom orders continue to reflect the broad weakness in the computing and telecom equipment markets.

Appliance and Tools orders primarily reflect weak demand for commercial-related motors, tools and storage products. However, consumer housing-related demand remains solid.

Process orders softened, driven by lower short-cycle maintenance and repair activity due to a slowdown in capital spending. Large oil and gas projects remain strong, and new project award activity, yet to be included in orders, has also been strong.

2

Total Emerson orders improved in February, indicating improved business conditions and supporting the outlook for increasing sales in sequential quarters, albeit at a modestly slower pace than previously anticipated.

Sales growth for the March quarter is now expected to be within the range of the November to January order rates, versus earlier expectations for a modest double-digit decline. On a sequential basis, sales growth for the quarter will be positive.
