November 2007 Order Comments:

Orders maintained a double digit growth rate for the three months ended in November and continued to benefit from favorable currency exchange rates, which contributed approximately 7 percentage points to the growth.

Process Management order growth continued to benefit from global expansion in the energy sector. Orders also benefited from the weaker dollar.

Industrial Automation remained strong, with particular strength from the power generating alternator and fluid automation businesses.

Order growth for Network Power was strong with growth led by the data center computing and telecommunications end markets.

Climate Technologies orders were strong with the United States residential air-conditioning business benefiting from favorable comparisons to the prior year. Order growth was also strong in Asia.

Appliance and Tools orders were consistent with the prior month with strength from the professional tools business more than offset by weakness in the residential storage, motors and appliance component businesses.
