See accompanying Notes to Consolidated Financial Statements.

Notes to Consolidated Financial Statements

1. In the opinion of management, the accompanying unaudited consolidated financial statements include all adjustments necessary for a fair presentation of operating results for the interim periods presented. Adjustments consist of normal and recurring accruals. The consolidated financial statements are presented in accordance with the requirements of Form 10-Q and consequently do not include all disclosures required for annual financial statements presented in conformity with U.S. generally accepted accounting principles (GAAP). First quarter 2010 results reflect the Company's reclassification of the appliance motors and U.S. commercial and industrial motors businesses (Motors) as discontinued operations in conjunction with the sale of those businesses in the fourth quarter of 2010, and the movement of the retained hermetic motors business from the Tools and Storage segment to the Industrial Automation segment. For further information, refer to the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended September 30, 2010.

Effective October 1, 2010 the Company prospectively adopted updates to ASC 605, *Revenue Recognition*, regarding allocation of the selling price to the various elements of multiple deliverables arrangements. Under the updated ACS 605, allocation of the selling price is now based on vendor-specific objective evidence and third party evidence, as well as management estimates of selling price. The impact of this change on any period presented is inconsequential.

Approximately ten percent of the Company's revenues arise from qualifying sales arrangements including the delivery of multiple elements, principally in the Network Power and Process Management segments. The vast majority of deliverables are tangible products, with a small portion attributable to installation, service and maintenance. Selling prices are primarily determined using vendor-specific objective evidence. Generally, contract duration is short-term and cancellation, termination or refund provisions apply only in the event of contract breach and have historically not been invoked.

2. Reconciliations of weighted average shares for basic and diluted earnings per common share follow (shares in millions). Earnings allocated to participating securities were inconsequential.

	Three Months Ended December 31,		
	2009	2010	
Basic shares outstanding	750.3	752.2	
Dilutive shares	5.2	5.9	
Diluted shares outstanding	755.5	758.1	

3. The change in equity is shown below (in millions):

Fiscal 2011	Stoc	ommon kholders' Equity	Noncontrolling Interests in Subsidiaries	Total Equity
September 30, 2010	\$	9,792	160	9,952
Net earnings		480	11	491
Other comprehensive income		(6)	2	(4)
Cash dividends		(261)	(19)	(280)
Net treasury stock purchases and other		165	(1)	164
December 31, 2010	\$	10,170	153	10,323

Comprehensive income, net of applicable income taxes, for the three months ended December 31, 2010 and 2009 is summarized as follows (in millions):

	1	Three Months Ended December 31,		
	2009		2010	
Net earnings	\$	437	491	
Foreign currency translation		7	(20)	
Cash flow hedges and other		24	16	
		468	487	
Less: Noncontrolling interests		13	13	
Amount attributable to common stockholders	\$	455	474	

The change in foreign currency translation during the first quarter of 2011 is primarily due to the strengthening of the U.S. dollar. The amount attributable to noncontrolling interests in subsidiaries consisted of earnings and foreign currency translation.

4. Net periodic pension and net postretirement plan expenses are summarized as follows (in millions):

	Three Months Ended December 31,						
		Pensions			Postretirement Plans		
	2	009	2010	2009	2010		
Service Cost	\$	19	21	1	1		
Interest Cost	Ψ	55	55	6	4		
Expected return on plan assets		(76)	(82)				
Net amortization		35	42	-	(2)		
Total	\$	33	36	7	3		

5. Other deductions, net are summarized as follows (in millions):

	Three Months Ended December 31,		
	 2009	2010	
Other deductions, net			
Amortization of intangibles	\$ 35	67	
Rationalization of operations	38	17	
Other, net	23	(3)	
Gains	(4)	(3)	
Total	\$ 92	78	

Other deductions, net decreased for the three months ended December 31, 2010, primarily due to lower rationalization expense, lower acquisition-related fees and prior year losses on foreign exchange transactions, partially offset by higher amortization expense on acquired intangible assets.

6. Rationalization of operations expense reflects costs associated with the Company's efforts to continuously improve operational efficiency and expand globally in order to remain competitive on a worldwide basis. The change in the liability for rationalization costs during the three months ended December 31, 2010 follows (in millions):

	nber 30, 010	Expense	Paid/ Utilized	December 31, 2010
Severance and benefits	\$ 57	7	21	43
Lease and other contract terminations	8	-	1	7
Fixed asset write-downs	-	-	-	-
Vacant facility and other shutdown costs	4	3	4	3
Start-up and moving costs	-	7	7	=
Total	\$ 69	17	33	53

Rationalization of operations by segment is summarized as follows (in millions):

	Th	Three Months Ended December 31,		
	20	2009		
Process Management	\$	7	2	
Industrial Automation		18	5	
Network Power		7	5	
Climate Technologies		3	4	
Tools and Storage		3	1	
Total	\$	38	17	

The Company expects to incur full year 2011 rationalization costs of approximately \$80 million to \$100 million, which includes the \$17 million shown above, as well as costs to complete actions initiated before the end of the first quarter and actions anticipated to be approved and initiated during the remainder of the year. Costs incurred during the first quarter of 2011 included shutdown costs and start-up and moving costs due to workforce reductions and/or the consolidation of facilities. Vacant facilities and other shutdown costs were not material for any segment. Actions during the first quarter of 2011 included Industrial Automation consolidating production facilities within North America; Network Power reducing forcecount in North America and Europe; and Climate Technologies consolidating production facilities in North America and Asia.

7. Other Financial Information (in millions):

	-	ember 30, 2010	December 31, 2010
<u>Inventories</u>			
Finished products	\$	746	797
Raw materials and work in process		1,359	1,410
Total	\$	2,105	2,207
Property, plant and equipment, net			
Property, plant and equipment, at cost	\$	8,307	8,412
Less: Accumulated depreciation		5,020	5,157
Total	\$	3,287	3,255

	September 30, 2010		December 31, 2010	
Goodwill by business segment				
Process Management	\$	2,274	2,264	
Industrial Automation		1,379	1,403	
Network Power		3,997	3,974	
Climate Technologies		464	483	
Tools and Storage		542	542	
Total	\$	8,656	8,666	

Changes in goodwill since September 30, 2010 are primarily due to foreign currency translation. Valuations of acquired assets and liabilities are in-process and purchase price allocations for acquisitions are subject to refinement.

Accrued expenses include the following:		
Employee compensation	\$ 683	502
Advance customer payments	\$ 385	424
Product warranty liability	\$ 224	219
Other liabilities		
Deferred income taxes	\$ 762	776
Pension plans	612	624
Postretirement plans, excluding current portion	380	378
Other	702	650
Total	\$ 2,456	2,428

8. Summarized information about the Company's results of continuing operations by business segment follows (in millions):

		Three months ended December 31,					
		Sales			Earnings		
	<u> </u>	2009	2010	2009	2010		
Process Management	\$	1,382	1,542	216	290		
Industrial Automation		986	1,210	109	185		
Network Power		1,381	1,669	206	182		
Climate Technologies		784	810	114	123		
Tools and Storage		434	446	81	93		
		4,967	5,677	726	873		
Differences in accounting methods				44	53		
Corporate and other				(128)	(152)		
Eliminations/Interest		(139)	(142)	(65)	(61)		
Total	\$	4,828	5,535	577	713		

Intersegment sales of the Industrial Automation segment for the three months ended December 31, 2010 and 2009, were \$126 million and \$117 million, respectively. The increase in Corporate and other for 2011 primarily reflects higher stock compensation expense of \$18 million related to a new stock option award in 2011, partially offset by the absence of the incentive stock plans overlap that occurred in the prior year.

9. Following is a discussion regarding the Company's use of financial instruments.

Hedging Activities – The notional value of foreign currency hedge positions totaled approximately \$1.2 billion as of December 31, 2010. Commodity hedges outstanding at December 31, 2010 included a total of approximately 61 million pounds of copper and aluminum. The majority of hedging gains and losses deferred as of December 31, 2010 are expected to be recognized over the next 12 months as the underlying forecasted transactions occur. All derivatives receiving deferral accounting are cash flow hedges. The following amounts are included in earnings and Other Comprehensive Income (in millions):

	G	Gain/(Loss) to Earnings Qtr Ended December 31,		Gain/(Loss) to OCI Qtr Ended December 31,	
	Qt				
	2	009	2010	2009	2010
<u>Location</u>					
Sales	\$	(3)	2	1	4
Cost of sales		(1)	5	16	7
Cost of sales		4	10	22	32
				39	43
<u>Location</u>					
Other inc/(exp)		10	6		
Cost of sales		1	1		
	\$	11	24		
	Sales Cost of sales Cost of sales Location Other inc/(exp)	Qt 2 Location Sales Cost of sales Cost of sales Location Other inc/(exp)	Otr Ended Dec 2009	Qtr Ended December 31, 2009 2010 Location Sales Sales \$ (3) 2 Cost of sales (1) 5 Cost of sales 4 10 Location Other inc/(exp) 10 6 Cost of sales 1 1	Qtr Ended December 31, 2009 Qtr Ended December 31, 2009

Regardless of whether or not derivatives receive deferral accounting, the Company expects hedging gains or losses to be essentially offset by losses or gains on the related underlying exposures. The amounts ultimately recognized will differ from those presented above for open positions which remain subject to ongoing market price fluctuations until settled. Derivatives receiving deferral accounting are highly effective, no amounts were excluded from the assessment of hedge effectiveness, and hedge ineffectiveness was immaterial for both quarters ending December 31, including gains or losses on derivatives that were discontinued because forecasted transactions were no longer expected to occur.

Fair Value Measurements – Valuations for all of Emerson's derivatives fall within Level 2 of the GAAP valuation hierarchy and are summarized below (in millions):

	 September 30, 2010			December 31, 2010	
	 Assets	Liabilities	Assets	Liabilities	
Foreign currency	\$ 67	(50)	41	(13)	
Commodity	\$ 31	(3)	54	(3)	

At December 31, 2010, commodity contracts and foreign currency contracts were reported in current assets. The Company held \$7 million of collateral posted by counterparties in the normal course of business as of December 31, 2010. The maximum collateral the Company could have been required to post as of December 31, 2010 was zero. As of December 31, 2010, the fair value of long-term debt was \$5,030 million, which exceeded the carrying value by \$403 million.

Items 2 and 3. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

The Company achieved strong sales and earnings results in the first quarter of 2011 aided by improving economic conditions and repositioning efforts in previous periods. Worldwide gross fixed investment is steadily recovering. In the Company's served markets industrial production and manufacturing activity have improved while residential and nonresidential construction remains weak. First quarter sales increased due to growth in all major geographic regions and from acquisitions, and all segments reported higher sales. Earnings increased for Process Management, Industrial Automation, Climate Technologies and Tools and Storage due to leverage on sales growth and benefits from repositioning efforts in prior periods while earnings declined in the Network Power segment. Emerson's financial position remains strong and the Company continues to generate substantial operating cash flow.

THREE MONTHS ENDED DECEMBER 31, 2010, COMPARED WITH THREE MONTHS ENDED DECEMBER 31, 2009

Following is an analysis of the Company's operating results for the first quarter ended December 31, 2010, compared with the first quarter ended December 31, 2009.

RESULTS OF OPERATIONS

Three months ended December 31,	2009	2010	Change
(dollars in millions, except per share amounts)			
Net sales	\$ 4,828	5,535	15%
Gross profit	\$ 1,868	2,163	16%
Percent of sales	38.7%	39.1%	
SG&A	\$ 1,134	1,311	
Percent of sales	23.5%	23.7%	
Other deductions, net	\$ 92	78	
Interest expense, net	\$ 65	61	
Earnings from continuing operations before income taxes	\$ 577	713	24%
Percent of sales	12.0%	12.9%	
Earnings from continuing operations common stockholders	\$ 417	480	15%
Net earnings common stockholders	\$ 425	480	13%
Percent of sales	8.8%	8.7%	
Diluted EPS – Earnings from continuing operations	\$ 0.55	0.63	15%
Diluted EPS – Net earnings	\$ 0.56	0.63	13%

Net sales for the quarter ended December 31, 2010 were \$5,535 million, an increase of \$707 million, or 15 percent, compared with net sales of \$4,828 million for the quarter ended December 31, 2009. The consolidated results reflect an 11 percent (\$508 million) increase in underlying sales (which exclude acquisitions and foreign currency translation), a 5 percent (\$230 million) favorable impact from acquisitions and a 1 percent (\$31 million) unfavorable impact from foreign currency translation. Underlying sales increased 10 percent in the United States and 11 percent internationally, reflecting volume gains. International sales results showed growth in all major geographic regions, including Europe (10 percent), Asia (9 percent), Canada (25 percent), Latin America (15 percent) and Middle East/Africa (11 percent). Sales increased in all segments led by Network Power, Industrial Automation and Process Management, which were up \$288 million, \$224 million and \$160 million, respectively.

Costs of sales for the first quarters of 2011 and 2010 were \$3,372 million and \$2,960 million, respectively. Gross profit of \$2,163 million and \$1,868 million, respectively, resulted in gross margins of 39.1 percent and 38.7 percent. The increase in gross profit and gross margin primarily reflects higher volume and resulting leverage, acquisitions and savings from cost reduction actions in prior periods, partially offset by material and wage costs.

Selling, general and administrative (SG&A) expenses for the 2011 first quarter were \$1,311 million, or 23.7 percent of net sales, compared with \$1,134 million, or 23.5 percent, for 2010. The increase of \$177 million was largely due to higher sales volume, acquisitions and higher incentive stock compensation expense of \$18 million. The slight increase in SG&A as a percent of sales was due to acquisitions, higher incentive stock compensation expense and wage costs, substantially offset by volume leverage and cost reduction savings.

Other deductions, net were \$78 million for the 2011 first quarter, a \$14 million decrease from the same period in the prior year, primarily due to lower rationalization expense, lower acquisition-related costs and prior year losses on foreign exchange transactions, partially offset by higher amortization expense on acquired intangible assets. See Notes 5 and 6 for further details regarding other deductions, net and rationalization costs.

Pretax earnings from continuing operations of \$713 million for 2011 increased \$136 million, or 24 percent, compared with \$577 million for 2010, primarily due to higher sales, gross margin improvement and lower expense from other deductions. Earnings results reflect increases of \$76 million in Industrial Automation and \$74 million in Process Management, partially offset by a decrease of \$24 million in Network Power.

Income taxes were \$222 million and \$148 million for 2011 and 2010, respectively, resulting in effective tax rates of 31 percent and 26 percent. The lower effective tax rate for 2010 reflects a \$30 million capital loss tax benefit resulting from restructuring at a foreign subsidiary. The effective tax rate for fiscal year 2011 is estimated to be approximately 31 percent.

Earnings and earnings per share from continuing operations common stockholders were \$480 million and \$0.63 for the 2011 first quarter, both increases of 15 percent compared with \$417 million and \$0.55 for 2010.

Net earnings common stockholders were \$480 million and net earnings per share were \$0.63 for the 2011 first quarter, both increases of 13 percent compared with \$425 million and \$0.56 for 2010. Net earnings for 2010 included earnings from discontinued operations of \$8 million related to the divested Motors and LANDesk businesses.

BUSINESS SEGMENTS

Following is an analysis of operating results for the Company's business segments for the first quarter ended December 31, 2010, compared with the first quarter ended December 31, 2009. The Company defines segment earnings as earnings before interest and taxes.

Process Management

Three months ended December 31,	2009	2010	Change
(dollars in millions)			
Sales	\$ 1,382	1,542	12%
Earnings	\$ 216	290	34%
Margin	15.6%	18.8%	

Process Management first quarter sales increased 12 percent to \$1,542 million as all businesses reported higher sales and earnings due to recovery in the capital intensive end markets served by this segment. Nearly all businesses reported strong sales growth, particularly the valves business and measurement and flow business, as a result of on-going recovery in this segment's principal end markets: oil and gas, chemical, power and refining. Underlying sales increased 13 percent from higher volume, while foreign currency translation had a 1 percent (\$10 million) unfavorable impact. Underlying sales increased in most regions, including the United States (18 percent), Asia (11 percent), Canada (51 percent), Latin America (21 percent) and Middle East/Africa (2 percent), while Europe decreased 1 percent. Earnings increased 34 percent for the period to \$290 million and margin increased over 3 percentage points, primarily due to leverage on higher sales volume, savings from prior period cost reductions, \$7 million of favorable foreign currency transactions versus prior year and material cost containment, partially offset by increased wage costs.

Industrial Automation

Three months ended December 31,	2009	2010	Change
(dollars in millions)	 		
Sales	\$ 986	1,210	23%
Earnings	\$ 109	185	70%
Margin	11.1%	15.3%	

Sales increased 23 percent to \$1,210 million in Industrial Automation for the first quarter due to recovery in the capital goods markets. Sales increased in all businesses led by very strong growth in the power generating alternators, electrical drives, fluid automation and power transmission businesses. Underlying sales increased 24 percent, foreign currency translation had an unfavorable impact of 2 percent (\$19 million) and the SSB acquisition added 1 percent (\$13 million). The underlying sales growth reflects an approximate 22 percent from higher volume and an estimated 2 percent from higher selling prices. Underlying sales increased in all regions, including 24 percent each in the United States, Europe and Asia. Earnings were \$185 million, compared with \$109 million in the prior year and margin increased over 4 percentage points, primarily reflecting leverage on higher sales volume, lower restructuring costs of \$13 million and savings from prior period cost reductions. Higher material and wage costs were partially offset by higher selling prices.

Network Power

Three months ended December 31,	2009	2010	Change
(dollars in millions)			
Sales	\$ 1,381	1,669	21%
Earnings	\$ 206	182	(12)%
Margin	14.9%	10.9%	

Sales for Network Power increased 21 percent to \$1,669 million for 2011 compared with the prior year, led by the Avocent and Chloride acquisitions which contributed 15 percent (\$217 million), plus underlying sales growth of 6 percent. Currency translation impact was negligible. Underlying sales growth reflects approximately 7 percent from higher volume less an estimated 1 percent decline in pricing as growth was led by strong results in the embedded power and North American uninterruptible power supply and precision cooling businesses. Underlying sales increased 9 percent in the United States, 3 percent in Asia, 6 percent in Europe and 35 percent in Middle East/Africa. Earnings of \$182 million decreased 12 percent compared to the prior year along with a 4 percentage point margin decrease due to increased amortization from the Chloride and Avocent acquisitions of \$25 million (1.5 points) and other Chloride acquisition-related costs of \$15 million (1 point). The other Chloride acquisition-related costs should be essentially eliminated by the second half of fiscal 2011. Margin was also impacted by negative price, higher material costs, higher costs to expedite inventory shipments, and investments made to develop next-generation data center infrastructure technologies. Pricing programs are being implemented to offset rising costs.

Climate Technologies

Three months ended December 31,	2009	2010	Change
(dollars in millions)	 		
Sales	\$ 784	810	3%
Earnings	\$ 114	123	9%
Margin	14.5%	15.2%	

Climate Technologies sales increased 3 percent in the first quarter to \$810 million, reflecting a solid sales increase in the compressor business, partially offset by declines in the temperature controls and temperature sensors businesses. Strong growth in the refrigeration end market was partially offset by a modest decline in the U.S. air conditioning market due to prior year customer inventory build in advance of a refrigerant requirement change. Sales growth reflects a 4 percent underlying increase from higher volume and a 1 percent (\$4 million) unfavorable impact from foreign currency translation. Underlying sales increased 12 percent internationally, including 12

percent in Asia and 14 percent in Europe, partially offset by a 3 percent decline in the United States. Earnings increased 9 percent to \$123 million due to favorable product mix and savings from prior period cost reductions, partially offset by higher material and wage costs.

Tools and Storage

Three months ended December 31,	 2009	2010	Change
(dollars in millions)	 		
Sales	\$ 434	446	3%
Earnings	\$ 81	93	14%
Margin	18.7%	20.8%	

Tools and Storage segment sales increased 3 percent to \$446 million for 2011, reflecting a 3 percent increase in underlying sales and a negligible impact from foreign currency translation. Underlying sales growth reflects approximately 3 percent higher volume and an estimated 1 percent from higher selling prices, partially offset by a more than 1 percent negative impact from outsourcing freight operations in 2010. The sales increase was led by strong growth in the tools business, partially offset by a decline in the consumer storage business due to continued weakness in the U.S. residential construction markets. Underlying sales increased 2 percent in the United States and 11 percent internationally. Earnings increased 14 percent to \$93 million and margin improved 2 percentage points, reflecting earnings growth in the tools business which was partially offset by a decline in the consumer storage business. Margin increased due to savings from prior period cost reductions and leverage on higher sales volume. Price increases offset higher material costs.

FINANCIAL CONDITION

Key elements of the Company's financial condition for the three months ended December 31, 2010 as compared to the year ended September 30, 2010 and the three months ended December 31, 2009 follow:

	September 30, 2010		December 31, 2010	
Working capital (in millions)	\$	2,514	2,705	
Current ratio		1.4 to 1	1.5 to 1	
Total debt-to-total capital		34.1%	33.6%	
Net debt-to-net capital		26.2%	26.5%	
Interest coverage ratio		11.3X	11.8X	

The Company's interest coverage ratio (earnings from continuing operations before income taxes plus interest expense, divided by interest expense) was 11.8 times for the first quarter of 2011, compared with 9.5 times for the prior year period, primarily due to lower average borrowings and higher earnings in 2011. Despite completing strategic divestitures and spending \$3 billion on acquisitions in fiscal 2010 to reposition the business for the future, the Company's financial ratios remain very strong.

Cash and equivalents decreased by \$99 million during the 2011 first quarter. Cash provided by operating activities of \$322 million was down \$365 million compared with \$687 million in the prior year period, primarily as a result of increased operating working capital. As the business shifts from slowing in the prior year, reinvestment in working capital is necessary to support the return to growth and we expect to improve working capital efficiency as the year progresses. Operating cash flow plus the \$116 million increase in short-term borrowings more than funded dividends of \$261 million, capital expenditures of \$82 million and treasury stock purchases of \$51 million. For the three months ended December 31, 2010, free cash flow of \$240 million (operating cash flow of \$322 million less capital expenditures of \$82 million) was down 60 percent from free cash flow of \$598 million (operating cash flow of \$687 million less capital expenditures of \$89 million) in the prior year.

In December 2010, the Company entered into a \$2.75 billion four-year revolving backup credit facility with various banks, which replaced a \$2.83 billion five-year revolving credit facility dated April 2006. The facility is maintained to support general corporate purposes, including commercial paper borrowings, and the Company has not incurred any borrowings under this or similar facilities previously. The credit facility contains no financial covenants and is not subject to termination based on a change in credit rating or material adverse changes. The facility is unsecured and may be accessed under various interest rate and currency denomination alternatives at the Company's option. Emerson pays inconsequential annual fees on the facility, based on the aggregate amount available for borrowing.

Emerson maintains a conservative financial structure which provides the strength and flexibility necessary to achieve its strategic objectives. The Company has been able to readily meet all its funding requirements and currently believes that sufficient funds will be available to meet the Company's needs in the foreseeable future through on-going operations, existing resources, short- and long-term debt capacity or backup credit lines. These resources will allow Emerson to reinvest in existing businesses, pursue strategic acquisitions and manage its capital structure on a short- and long-term basis.

FISCAL 2011 OUTLOOK

Based on current economic conditions and the Company's performance in the first quarter, fiscal 2011 sales are forecast to be in the range of \$24 billion to \$24.5 billion, or 14 to 17 percent compared with 2010 sales of \$21.0 billion. Underlying sales are expected to increase in the range of 10 percent to 13 percent, which excludes estimated favorable increases of 3 percent from completed acquisitions and 1 percent from foreign currency translation at current exchange rates. Based on this level of sales, the Company forecasts 2011 diluted earnings per share in the range of \$3.15 to \$3.30, rationalization of operations expense is estimated to be approximately \$80 million to \$100 million, operating cash flow is targeted at approximately \$3.3 billion to \$3.5 billion and capital expenditures are estimated at approximately \$600 million.

Statements in this report that are not strictly historical may be "forward-looking" statements, which involve risks and uncertainties, and Emerson undertakes no obligation to update any such statements to reflect later developments. These risks and uncertainties include economic and currency conditions, market demand, pricing, and competitive and technological factors, among others which are set forth in the "Risk Factors" of Part I, Item 1, and the "Safe Harbor Statement" of Exhibit 13, to the Company's Annual Report on Form 10-K for the year ended September 30, 2010, which are hereby incorporated by reference.

Item 4. Controls and Procedures

Emerson maintains a system of disclosure controls and procedures which are designed to ensure that information required to be disclosed by the Company in the reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and is accumulated and communicated to management, including the Company's certifying officers, as appropriate to allow timely decisions regarding required disclosure. Based on an evaluation performed, the Company's certifying officers have concluded that the disclosure controls and procedures were effective as of December 31, 2010 to provide reasonable assurance of the achievement of these objectives.

Notwithstanding the foregoing, there can be no assurance that the Company's disclosure controls and procedures will detect or uncover all failures of persons within the Company and its consolidated subsidiaries to report material information otherwise required to be set forth in the Company's reports.

There was no change in the Company's internal control over financial reporting during the quarter ended December 31, 2010 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Issuer Purchases of Equity Securities.

			Total Number of	Maximum Number

Certification

- I, D. N. Farr, certify that:
- 1. I have reviewed this quarterly report on Form 10-Q of Emerson Electric Co.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
- a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
- b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
- c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
- d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors:
- a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
